Absolutely, I'm **genuinely interested** in contributing to 3D printing, and I'm more than willing to **offer my assistance for free**. I believe it's a win-win situation where I can both **support Mr. Kevin and learn the essential skills** required to be a valuable asset to our project.

Today, I plan to reach out to Mr. Kevin and express my eagerness to collaborate with him on 3D printing projects. I'll kindly ask if he'd be open to guiding me, and if he could share some insights on the software he recommends for exploration. This way, I can better prepare and contribute effectively for future work.

One small update: I'm currently out of the city, but I'll be **back in Berlin** by **noon tomorrow**, Sunday. Looking forward to taking the next steps and contributing to our project. Please feel free to let me know if there's anything else I should consider.

Best regards,
Siddharth Patel

Hi Sid,

In fact, this little job could be an idea to start working for the project.

Means:

- develop 3D model for required application
- printing at HTW workshop (maker space)

Perfect for asking is Kevin, he's our 3D printer expert. I propose to contact and ask him which software to use for 3D modeling.

To make it clear: On mid and long term I see you in SW programming for rover and copter.

This job would be a start during the next ten days. Beginning of November I would like to give you other jobs.

So, it's a question if you have now the time and interest to work for free for the project. If not, it's ok, then we start in November.

Best,

Jan

Good day,

Thank you for your email. In response to your inquiry, I'd like to clarify that **I don't have direct experience with 3D printing**. However, I am very interested in learning about it and would be more than **willing to help any team member who is already working on 3D printing** projects. Please feel free to connect me with the team member involved in 3D printing, and I'll be happy to learn from them and support their efforts without causing any disruption.

Best regards,
Siddharth Patel

Hello Sid,

are you experienced with 3D-Printing? I yes, I have a little work package for you.

Hope you're fine, thank you for your email. Looking forward to hearing from you.

Best,

Jan

Good day, Prof. Dr.-Ing. Jan Hanno Carstens,

I hope this message finds you well. I am writing this email to express my gratitude for the wonderful opportunity you have extended to me. I am truly appreciative of not only the job offer but also the chance to work on something that I am passionate about.

Moreover, I want to emphasize that the trust you have placed in me will not be in vain. I am committed to making the most of this opportunity, not only to enhance my own skills and knowledge but also to contribute my very best to our project. Your confidence in me serves as a great motivation, and I am determined to ensure that you never regret your decision.

Throughout my academic journey, I have always been a dedicated student, investing extra time and effort in subjects I am truly passionate about. I have often asked myself whether my hard work and dedication would pay off in the future. Your offer has given me the assurance that it will. This job opportunity, working on your project, has become a source of immense motivation for me.

Once again, I extend my heartfelt thanks to you for this opportunity. I am eagerly looking forward to collaborating on the project and being a part of your team.

If there are any improvements or changes you would like to suggest, please feel free to let me know. I am open to your feedback and always eager to learn and grow.

Thank you again for this fantastic opportunity.

Sincerely,

Siddharth Patel
